Personal Profile

Persistent problem solver with hands-on experience in embedded systems debugging and a strong foundation in digital, analog, and VLSI fundamentals. Skilled at tracing faults, validating assumptions, and systematically isolating root causes — believing the real issue matters more than a quick fix. Seeking to apply this analytical, detail-driven approach to VLSI Test Engineering, where accurate diagnosis and reliable solutions are essential.

Education

2023 – 2027	B.Tech – Electronics & Communication Engineering (Minor: CS) <i>FISAT, Angamaly – APJ Abdul Kalam Technological University</i> CGPA: 8.83
2021 – 2023	Higher Secondary Education (Class XII) <i>St. George HSS</i> 97.3%
2020 – 2021	High School (Class X) <i>Vimala Public School (CBSE)</i> 95.6%

Technical Skills

Core Electronics & VLSI

Digital Electronics, Analog Electronics, VLSI Fundamentals, Verilog HDL

Embedded Systems

ESP32, Raspberry Pi, Sensor & Actuator Interfacing, PCB Design (KiCad)

Simulation & Analysis Tools

LTspice, MATLAB, VS Code, Linux, Fusion360, KiCad, Unity (VR), GitHub

Programming

C, Python, Embedded C

Projects

Human Centric Embodied Home Assistant

Mini Project

Developed a Raspberry Pi-based human-centric home assistant featuring voice interaction, face recognition, radar-based presence detection, and smart home automation, with a primary focus on designing a custom PCB for integrated hardware control and system connectivity.

TSLV Robot

Micro Project

Implemented a Wi-Fi-controlled robot using ESP32, enabling real-time motion control via a mobile phone interface and OLED-based facial expressions triggered by touch sensors.

Virtual Horizon

VR Workshop

Co-developed a VR game in Unity for a team project and presented its educational/tourism applications to a non-technical audience at Vidyodaya School, Edappally.

Certifications & Achievements

- FPGA Prototyping Using Verilog HDL – NIELIT
- Microprocessors and Microcontrollers – NPTEL
- 1st Place – INNOVIX (RISE 2026) Project Exhibition
- Machine Learning – NSDC
- Python for Data Science – NPTEL
- NCC 'B' Certificate

Interests

- Electronics & Circuit Design
- 3D Modeling
- Robotics
- Technology & Engineering Content
